Saad Al Majayda

Software Developer

✉ reivlse20@hotmail.com   ☎ 0535036592   ⚲ Riyadh, Saudi Arabia

Highly motivated software developer with 4 years of experience and I have a proven track record of success in developing and delivering high-quality eServices. I am confident that I can make a significant contribution to your team and help you achieve your business goals.

Specifically, I have experience in the following areas:

- Analyzing the business requirements of solutions including the its business process
- Developing and delivering eServices
- Designing and implementing user interfaces
- Managing and maintaining eServices
- Troubleshooting and resolving eService issues
- Working with cross-functional teams
- Communicating effectively with stakeholders

I am a team player and I am always willing to go the extra mile to get the job done. I am also a quick learner and I am always eager to learn new things. I am confident that I would be a valuable asset to your team.

Skills & Tools	**Angular	.NET Core** **K2	Kofax Total Agility (BPM)** JavaScript	PHP	Canva
Education	**Bachelor's degree, Computer Science	2019** Shaqra University, **Excellent** - Second Class Honor Alinma Bank T24 Bank System	2018 (2-Months)

Software Developer 2019 to Present
King Abdullah City for Atomic and Renewable Energy K.A.CARE

Experience

Internal eServices

- **eService**
  - Developing more than 33 internal Services following the agile SDLC methodology including HR, IT, PR.
  - Collaborated with clients to thoroughly gather the requirements and conduct in-depth analyses to identify optimal automation opportunities
  - Writing comprehensive business requirements documentation for automated processes, ensuring clarity, alignment, and optimal implementation.
  - creating an entity relationship document diagram, clearly illustrating data relationships and optimizing database design.
  - Developed and presented interactive prototypes to clients, facilitating transparent communication and ensuring precise identification of automation targets
  - build eServices with dynamic user interfaces using Angular.
  - Build an eServices back-ends utilizing the robust capabilities of .NET Core.
  - Designed and implemented optimized workflows for eServices using the powerful capabilities of Kofax Total Agility BPM
  - using SharePoint's to manage document attachments, while employing MS SQL Server for secure and reliable data storage
- **Innovation Platform**
  - build eServices with dynamic user interfaces using Angular.
  - Build an eServices back-ends utilizing the robust capabilities of .NET Core.
  - Designed and implemented optimized workflows for eServices using the powerful capabilities of Kofax Total Agility BPM.

External eServices

- **TLC Technology Localization Content Portal**
  - build eServices with dynamic user interfaces using Angular.
  - Build an eServices back-ends utilizing the robust capabilities of .NET Core.
    - https://apps.energy.gov.sa/tlc/home

- **UCP Universities Collaboration Program Portal**
  - Writing comprehensive business requirements documentation for automated processes, ensuring clarity, alignment, and optimal implementation.
  - Developed and presented interactive prototypes to clients, facilitating transparent communication and ensuring precise identification of automation targets
  - build eServices with dynamic user interfaces using Angular.
  - Build an eServices back-ends utilizing the robust capabilities of .NET Core.

- **HCB Human Capacity Building**
  - Writing comprehensive business requirements documentation for automated processes, ensuring clarity, alignment, and optimal implementation.

- **ASP Atomic Supplier Portal**
  - Developed and presented interactive prototypes to clients, facilitating transparent communication and ensuring precise identification of automation targets
